WILSON PROTESTS AGAINST SALE OF HANAIKAMALAMA

He Reminds the Government That the Property Was Bought for a Site for a Water Filtration Plant.

Editor Advertiser: I see by the paper that Land Commissioner Pratt has advertised the sale of Hanaiakamalama, a piece of land situated in Nuuanu Valley. This property was purchased by the then government during 1890 or 1891, for the sum of about \$7000 and for the special purpose of a site for establishing filter beds, and a distributing reservoir for the city, which was looked upon then as one of the much-needed public works recognized as a public necessity by the then administration. The scheme then under consideration and practically settled upon was part of the plans in connection with the storage reservoir above Luakaha, for the increased capacity of the Nuuanu system. Hence the purchase.

This site was selected for its many advantages. 1st.—That it was of sufficient area. 2nd.—Close proximity to the distributing reservoir at the government electric works. 3rd.—It had sufficient fall (50 feet lower than the electric light reservoir, and head to facilitate filtration through filter beds or chemical filters. 4th.—It has, at 350 feet above mean tide, a suitable elevation for all practical purposes for the city's system.

Now, Mr. Editor, since the administration of today had seen fit to accept and carry out a part of the general plan, as devised by past administrations, in the increased storage and power system of Nuuanu Valley water works—to dispose of this site, which is unequalled for the purpose in that vicinity, is incomprehensible. The present administration cannot be so blind, so apathetic and so devoid of forethought as not to know that sooner or later a filter plant must be constructed and established in the Nuuanu Valley system, for the filtration of all of the water to be supplied to the city from the large storage reservoir above Luakaha now under construction; and that circumstances and conditions will arise, that the public welfare of the community will demand it.

In view of the reasons above stated, why dispose of this property—an ideal site and purchased for the purpose, and paid for out of funds of the Honolulu water works appropriated by the Legislature? While the property is a part of the water works of the city it should be held as such until sufficient funds are available for the construction of a filter plant, as it is the only site suitable for the purpose, and in line and keeping with the general lay of the pipe and water system of Nuuanu Valley.

Those most interested, the consumers of water from the Nuuanu system, should protest against the sale of this property, for the time will surely come when this particular site will be required for the purposes mentioned.

CHAS. B. WILSON.

Waikahalulu, April 23, 1906.

WEATHER BUREAU REPORT.

U. S. Department of Agriculture. Weather Bureau.

The following data, covering a period of 29 years, have been compiled from the Weather Bureau and McKibbin records at Honolulu, T. H. They are issued to show the conditions that have prevailed, during the month in question, for the above period of years, but must not be construed as a forecast of the weather conditions for the coming month.

Month, May, for 29 years.

TEMPERATURE (1890-1905).

Mean or normal temperature, 75 deg. The warmest month was that of 1895, with an average of 76 deg.

The coldest month was that of 1905, with an average of 73 deg.

The highest temperature was 87 deg. on May 28, 1897.

The lowest temperature was 60 deg. on May 5 and 6, 1902.

PRECIPITATION (RAIN) (1877-1894 AND 1905).

Average for the month, 2.27 inches.

Average number of days with .01 of an inch or more, 12.

The greatest monthly precipitation

was 11.29 inches in 1885.

The least monthly precipitation was 0.23 inches in 1878.

The greatest amount of precipitation recorded in any 24 consecutive hours was 9.68 inches on May 10, 1885.

RELATIVE HUMIDITY.*

Average—9 a. m., 67 deg.; 9 p. m., 74 deg. (1893-1904). 8 a. m., 66 deg.; 8 p. m., 69 deg. (1905).

CLOUDS AND WEATHER (1890-1905). Average number of clear days, 11; partly cloudy days, 17; cloudy days, 3.

WIND.

The prevailing winds have been from the northeast.

The average hourly velocity of the wind during May, 1905, was 9.0 miles.

The highest velocity of the wind during May, 1905, was 28 miles from the northeast on the 13th.

Station: Honolulu, T. H. Date of issue: April 28, 1906.

* 9 o'clock averages from records of Territorial Meteorologist; 8 o'clock averages from U. S. Weather Bureau records. T. F. DRAKE, Acting Section Director, Weather Bureau.
